SKILLS   React, Redux, Flask, Python, SQLAlchemy, JavaScript, HTML, CSS, SQL, Express

PROJECTS

Survivr (ReactJS, Express, CSS)   live | github

A Flickr clone dedicated to the fans of the reality game show Survivor, written fully in JS

- Utilized AWS S3 to perfect image uploads by the user reducing server load and providing the potential for scalability of image services.
- Four fully-synchronous MVPs adding to the UX giving the client a plethora of ways to interact with the UI

Quitter (Flask, ReactJS, CSS)   live | github

A Twitter clone meant to serve as a community for those in recovery from addiction, with a Python backend and ReactJS frontend

- Utilized over 35 hand-built frontend components in JavaScript using the React library to provide the user with maximum functionality when communicating with other users.
- Mastered CSS site-wide to exude a place of warmth and belonging to the user to increase returning users ten fold.
- Utilized AWS S3 to perfect image uploads by the user reducing server load and providing the potential for scalability of image services.

Heirbnb (Flask, ReactJS, CSS)   live | github

An Airbnb clone with only the most luxurious properties that are fit for royalty, with a Python backend and ReactJS frontend

- Utilized AWS S3 to perfect image uploads by the user reducing server load and providing the potential for scalability of image services.
- Replicated near pixel-perfect CSS to give the user the feel that they were actually on airbnb.
- Muscled out a sweet and simplistic search bar to help the user search for properties in a more organized fashion.

EXPERIENCE

Professional Poker Player

Self-employed   Mar 2011 - Dec 2021

- Bested fields of hundreds (sometimes thousands) of talented players and amassed career earnings totaling ~$700,000.
- Developed and perfected critical thinking, mathematical studying, and behavioral analysis skills to navigate the ebbs and flows of the massive amounts of variance that encompass the game of poker.

Server

Outback Steakhouse   2005 - Mar 2011

- Provided the customer with extensive knowledge of a substantial dinner menu.
- Created an inviting and comforting dining atmosphere for the customer that resulted in repeated returns to the restaurant.
- Stayed constantly busy with either engaging the customer, inputting and running orders, or cleaning the establishment to display my extreme work ethic.

EDUCATION

App Academy / *Summer 2022*

- Full-stack web development bootcamp with 1000-hour curriculum and <3% acceptance rate

Virginia Commonwealth University / *2005 - 2008*

- *3 years of Mechanical Engineering undergrad*
